- drivers for drill to match screws
- chop saw with diamond blade or masonry saw
- level
- rubber hammer
- hand held brush
- measuring tape
- string line for leveling
- utility knife
- skill saw (for wood strips)
- caulking gun
- scaffolding
- hammer
- gloves
- safety glasses
- dust mask
- earplugs

## Note on cutting Novabrik

Cutting brick is often a key part of installation. You can use either a wet saw or a dry saw with diamond blades.

Although a dry saw will be easier to move around. A wet saw will reduce dust while cutting. Thoroughly rinse with clean water to remove any cement paste left over to avoid staining when the brick dries up.

Take all necessary precautions to protect yourself from dust. Use safety glasses and a dust mask.
